ARE YOU READY FOR WINTER FLYING?

Remember it is not quite spring yet.

- ✓ Allow sufficient time for thorough preflight planning
 - ✓ Give yourself a multitude of options
 - ✓ Review your pilot's operating handbook
 - ✓ Dress so that you can conduct a thorough preflight
- ✓ Remember there is much less daylight flying time available
- ✓ Allow time for preheating, or better yet, store the aircraft overnight for early departures
 - ✓ Remove ALL snow, ice, & frost from aircraft surfaces prior to flight
- ✓ Taxi speeds must be consistent with conditions (watch out for snowbanks!)
 - ✓ Review aircraft performance numbers very carefully
- ✓ Use all available weather sources both before and during flight
 - ✓ Review carburetor ice procedures
 - ✓ Plan letdowns wisely
 - ✓ Landing surfaces might be treacherous
 - ✓ Are you prepared for survival options?
- ✓ File and activate a flight plan, use ATC flight following!
- ✓ Tell someone where you are going, and when you should be back
 - ✓ Do you have a carbon monoxide detector?
- ✓ Have a healthy respect for ice, no matter what sort of equipment you operating.

If inclement weather is forecasted and you are wondering if a safety program has been cancelled, please call:
